# The Key

## > Mini USB Flash drive

### A Meaningful key

With its KEY shape and ultra flat design, this USB Key drive will surprise your customers.

The same size of a KEY, this Flash drive will find its way to all the keychains, even the most crowded ones.

This key has nevertheless an exceptional storage capacity of up to 8 GB ! To fit such a huge memory in such a small product we had to go for the Nano technology of Chip On board (COB).

COB technology allows you to lay the silicon chip directly onto the substrate, requiring the smallest possible space and ensuring that it will well resist dust, water and choc.

### > MAIN FEATURES
